**BIM-350**

**22" MODULAR ICE MACHINE**

Shown with BIN-230 ice storage bin

**FEATURES**

**ICE PRODUCTION**

Daily Ice Production: 350 lbs per 24 hours  
Ambient Air Temperature: 70° - 90°F  
Energy Consumption: 790W

**OPERATING REQUIREMENTS**

Water Temperature Range: 40° - 90°F  
Water Line Connection: 3/8"  
Water Pressure: 18.75 psi to 80 psi;

**FEATURES & CONSTRUCTION**

- Air cooled condensor is energy efficient
- 304 Stainless steel construction with black accents
- Anticorrosive nickel-plated evaporator plate
- Digital control panel with easy to use controls
- Removable, easy-to-clean air filter
- Adjustable ice thickness
- Bright LED light to illuminate the ice bin (sold separately) underneath
- Includes external water filter and drain hoses

**WARRANTY**

- One year parts and labor
- Five years on the compressor and evaporator plate

**FEATURES**

22" air cooled modular ice machine is capable of producing up to 350 lbs of ice per 24 hours. The narrow width is great for tight spaces that fits the needs of busy restaurants, bars or cafes. The easy-to-use controller can be used to monitor the current stage of ice production and also allows you to adjust the ice thickness and initiating the cleaning cycle. Constructed of durable 304 stainless steel, these units are built to last in the busiest commercial environments. A nickel plated evaporator plate and removable air filter make for simple cleaning and maintenance. Includes hoses and external filter. These units have a NEMA 5-20P electrical connection for operation. ETL Listed and ETL Sanitation.
